

ENVIRONMENTAL POLICY

A primary objective of MPS Building & Electrical is to maintain a high standard in environmental protection & conservation.

MPS Building & Electrical will:

- Comply with environmental legislation, codes and guidelines
- Identify and manage environmental risks
- Adopt best practice, setting targets, monitoring and continuously improving environmental performance
- Raise staff and community awareness of the benefits to industry in protecting and reducing impact on the environment

MPS Building & Electrical will implement the following:

- Management will demonstrate leadership and commitment necessary to foster a culture of environmental responsibility
- Minimising, and where possible, eliminating impacts of company activities on the surrounding social and natural environment
- Implementing these environmental management systems
- Managing environmental factors including:
 - Minimising pollution
 - Resource recovery, recycling and waste management
 - Sustainable development
 - Managing water process
- Environmental risks are to be identified, assessed and controlled to minimise and reduce environmental impacts of operation
- All workers and contractors have a responsibility to protect the environment and to prevent pollution
- All staff will be provided with knowledge, awareness and resources required to meet their environmental responsibilities
- Our operations, decisions, plans and actions will be conducted in accordance with this environmental policy
